

# TOOL BOX TALK

## Quality Control Job Site Checklist

	<u>Yes</u>	<u>No</u>
1. Are tarps in place for any exposed work, holes or gaps to prevent damage from the elements?	<input type="checkbox"/>	<input type="checkbox"/>
2. Are cars moved away and any other third party property from any possible oversprays?	<input type="checkbox"/>	<input type="checkbox"/>
3. Has diagnostic testing been conducted on a mechanical system when hooked in?	<input type="checkbox"/>	<input type="checkbox"/>
4. Are the proper size parts given per the spectra's and is this verified or confirmed?	<input type="checkbox"/>	<input type="checkbox"/>
5. Was a physical inspection made of the work prior to leaving each day?	<input type="checkbox"/>	<input type="checkbox"/>

This checklist should be used for the ending stages of a job prior to turning the project over to the owner. The emphasis would be on quality controlling not only our product system or work.
